	<p>and make recommendations to Senior Management on plan of action.</p> <p>A revised action plan, with milestones leading up to the planned implementation date of March 2013, will be presented to Audit Committee once it has been reviewed and agreed on by LED and IOGC.</p>		
<p>2. The Audit and Evaluation Sector recommends the Assistant Deputy Minister, Lands and Economic Development should establish a regulatory gap management strategy that includes a single point of responsibility; policy and associated guidance/procedures, including those for Department owned assets; and identifies the internal resources required to implement the strategy, based on a needs assessment. In developing the strategy, the</p>	<p>Aboriginal Affairs and Northern Development Canada (AANDC) and Environment Canada (EC) have identified the extent of the regulatory gap on reserve and are in the process of conducting a risk assessment and prioritizing which aspects of the gap to address first. Once the risk assessment and prioritization are complete, AANDC and EC will develop several options to closing the gap and present them to senior management for further direction.</p>	<p>October 2012</p>	<p>Status: <i>Underway</i></p> <p>Update/Rationale: As of 31/03/2014:</p> <p>The risk assessment of environmental regulatory gaps on reserve was conducted in consultation with EC, and the gaps related to waste management were prioritized due to the associated environmental, human health, legal and financial risks.</p> <p>Options to address waste management on reserve have been developed. A preliminary assessment of internal resource requirements was undertaken, which examined historical resource allocations and projected costs, to support a suite of options to: improve internal processes; strengthen First Nation and community practices; and, address illegal sites. <p>ADM, LED should work with Environment Canada to identify areas where new regulations may be developed to close gaps.</p>	<p>This recommendation will be addressed through the EMS development process and modernization of AANDC's environmental policy framework.</p> <p>A preliminary assessment of internal resource requirements will be undertaken when options to close the regulatory gap are presented to senior management.</p>	<p>October 2013</p> <p>October 2012</p>	<p>waste management research compendium was created on GCPedia, and a deck to seek a decision on an options path forward was presented to DGIOC on March 24, 2014. DGIOC requested that LED work with RO/Regions to further refine recommendations prior to presenting at Operations Committee. Follow-up work is underway and presentations are planned with RO-Senior Management Committee and Operations Committee.</p> <p>Progress on developing a waste management strategy has been informed by efforts undertaken to develop an EMS process. This includes research and assessment undertaken with regions on existing data, provincial legislation and regulations, federal regulations, compliance, and monitoring. The options also build upon the progress that has been achieved towards modernizing the environmental policy framework (e.g. applying the changes to the <i>Canadian Environmental Assessment Act, 2012</i>; closing the regulatory gap on drinking water through the <i>Safe Drinking Water for First Nations Act</i>).</p> <p>AES: Implementation ongoing.</p>

	<p><i>Term Prosperity Act</i>", which was introduced in the House of Commons on April 26, 2012. The Responsible Resource Development initiative under Bill C-38 includes specific legislative changes to the <i>Canadian Environmental Assessment Act</i>. This could change the approach required for assessing environmental impacts of projects and activities on reserve. LED is leading a Task Team to create a new regime to ensure mitigation of environmental impacts will occur.</p> <p>Monitoring and enforcing the Terms and Conditions of an approval is up to the departmental authority responsible for the approval (e.g. Lands/Aboriginal Business Development Program/IOGC/etc.). Projects often involve one time funding, which will make a FNITP tracking approach difficult. The department is exploring options for managing information in</p>		<p>significance of environmental effects associated with the physical activities. Additionally, Environment Officers are required to incorporate them into the terms and conditions of their authorizations including funding. LED has worked with the Federal Lands Working Group comprised of all federal lands departments to ensure a consistent federal reporting process, CFO on the information and technology management requirements including DCI's and finally, the Corporate Secretary Branch to deal with access to information and privacy matters on the Environmental Management Approach (EMA) file.</p> <p>AES: Fully Implemented. The recommendation will be closed. Closed.</p>

<p>Economic Development should define a departmental position on the enforcement of lease, permit and other environmental regulatory requirements, identify mechanisms to enforce these requirements, and provide adequate levels of training and staffing to enable the Department to fulfill its enforcement roles and responsibilities.</p>	<p>respect to leases, permits and regulatory requirements and will modernize its environmental policy framework accordingly. Further instruction on applying corrective measures to ensure lease and permit provisions are followed may be developed through directives or procedures. An analysis of training requirements associated with the above will be undertaken.</p> <p>A revised action plan, with milestones leading up to the planned implementation date of October 2013, will be presented to Audit Committee once it has been reviewed and approved by the national EMS working group.</p>		<p>As of 31/12/2013:</p> <p>After the introduction of the <i>Canadian Environment Assessment Act, 2012 (CEAA 2012)</i>, AANDC began scoping out implications of <i>CEAA 2012</i> on the Department. As a result of these efforts, a New Environmental Review Process has been developed, procedures have been defined and scope of the approach has been determined. Under this new process, a significant proportion of projects involving leases, permits, and regulatory permits are risk assessed and environmentally reviewed factoring in the <i>Species at Risk Act</i>, <i>Canada Environmental Protection Act</i> and the <i>Fisheries Act</i>, and other appropriate federal legislation.</p> <p>As cited above, the scope of AANDC's approach has been defined, which has informed development of options to support an Environmental Management System and ongoing efforts to review and maintain policies. For example, environmental clauses have been added or revised to the new draft Additions to Reserve policy, the new Locatee Lease policy, and the new commercial lease precedent. Other land management instruments requiring environmental conditions will be considered as part of regular business.</p> <p>Training requirements have been analyzed and a number of tools have been developed, approved at Operations Committee and implemented to assist</p>

			<p>departmental staff and First Nations to understand the changes.</p> <p>When the Action Plan for the Audit of Environmental and Contaminated Sites Management (South of 60) was first presented, the Department had contemplated returning to the Committee with a fast-tracked Action Plan that would see earlier milestones identified leading up to the implementation date of October 2013. As the scope and implications of <i>CEAA 2012</i> for AANDC were clarified, efforts were diverted to respond to the implementation of this legislation and opportunities to fast track the Environmental Management System did not materialize. Four presentations were made at ADM Operations Committee (June 2012 – October 2013) to update progress, obtain direction and seek approval on the development of the Environmental Review Process.</p> <p>AES: Implemented. The recommendation will be closed.</p>

<p>training needs of First Nations (inclusive of FNLMA and non-FNLMA First Nations) and align budget to identified needs.</p>	<p>under a departmental Environmental Management System in order to align identified budget needs.</p> <p>Currently, training in relation to environmental management is provided to First Nations participating under the Reserve Land and Environment Management Program. Two environmental courses are provided by the University of Saskatchewan and environmental components in relation to specific land management instruments are included in the technical training delivered by the National Aboriginal Lands Managers Association. Training support provided by external service providers such as the National Aboriginal Lands Managers Association and the University of Saskatchewan will be reviewed</p>		<p>a number of reasons. First, efforts in Quarter 2 have focused on finalizing the scope of the Environmental Management System (EMS), a system to coordinate environmental management within the Department. Part of this effort has included examining EMS models from other federal departments and identifying best practices. Findings do not support undertaking external needs assessments, but rather support examining the environmental aspects of the organization itself. Additionally, success factors from other federal departments suggest a phased approach with a narrowed scope of implementation. In short, progress on the development of the EMS based on success factors no longer favours a needs assessment. In fact, efforts to conduct such an assessment may shift attention away from critical areas where EMS implementation should commence within a phased approach. As part of the work in developing the EMS, research and assessment on existing data, provincial legislation and regulations, federal regulations, compliance and monitoring was completed with regions in Quarter 2. Furthermore, a Gap Analysis was conducted, which highlighted the Departmental needs to address all its environmental aspects. Findings suggest</p>
