The existing rights to use and operate on the Sahtu lands which are described above and shown on the Plans shall include:

- IPL(NW) shall have the continuing right, privilege and easement of access through and over those lands as shown on the Plans for the purpose of a right-of-way for persons and vehicles, including aerial inspection and all modes of transport of whatsoever kind, for itself, its agents, employees, and contractors and all other persons so authorized. IPL(NW) shall peaceably hold and enjoy the rights of access hereby granted without protestation or interruption on the part of a designated Sahtu organization or Canada. For greater certainty, all access between the winter road and the pipeline right-of-way, both as shown on the Plans, shall vary in length or width as may be required to ensure there is physical connection to the winter road as actually constructed from year to year and the Plans shall be deemed to be interpreted accordingly.

- A designated Sahtu organization, without the prior written consent of IPL(NW), shall not excavate, install, erect or place or cause or permit the excavation, installation or erection of any structure or thing which would interfere with the use of the lands by IPL(NW) as described in the Plans.
- With respect to those uses identified above as quarry sites, IPL(NW) shall have the right to access, with such equipment and personnel as necessary, quarry sites and to work and remove from such sites those amounts of sand, gravel, shale and other materials as is necessary for the operation and maintenance of the pipeline, subject to such charges for these materials as may be agreed to between IPL(NW) and the Sahtu Tribal Council or, failing agreement, such charges as may be determined by the Land and Water Board, having regard to the fair market value of the material removed from the sites.
- The rights are granted for so long hereafter as IPL(NW), or its successors or assigns, requires such rights for the operation of the pipeline. No charges, fees or conditions shall be raised or levied by a designated Sahtu organization for the rights provided herein for the ingress or egress to the pipeline right-of-way or any other land associated with pipeline operations and maintenance.
- This right of access is, and shall be, of the same force and effect as a covenant running with the land and constitutes an interest in land. A designated Sahtu organization and Canada shall, if required in order to register the caveats described in paragraph 6, execute such further documentation and assurances in respect of the land as may be required.
- The Registrar of the Northwest Territories Registration District (the "Registrar") shall accept for registration two caveats to be prepared and submitted by IPL(NW) claiming interests in the Sahtu lands described in the schedule. The first caveat shall claim an interest in land pursuant to the rights granted by Canada to IPL(NW) pursuant the agreements dated September 28, 1982 and June 12, 1984 and as further described in the preamble to this schedule. The second caveat shall claim an interest with respect to the rights specified in this schedule. IPL(NW) shall prepare and submit these two caveats to the Registrar concurrent with the creation of the first Certificates of Title for the Sahtu lands in the schedule. Upon receipt of the said caveats and concurrent with the creation of the Certificates of Title, the Registrar shall endorse a memorandum with respect to the two caveats as the first and second registrations respectively against the said Certificates of Title.
